Ontology Requirements Specification Document	
1	Purpose
	To provide a structured knowledge base for modeling relationships between movies, actors, and directors to support semantic search.
2	Scope
	Mainstream movies from 2000 to the present, focusing on metadata like cast, crew, genre, and ratings.
3	Implementation Language (optional)
	OWL (Web Ontology Language)
4	Intended End-Users (optional)
	Cinema researchers, recommendation system developers, and movie enthusiasts.
5	Intended Uses
	Serving as a backend for an ontology-driven chatbot and a semantic recommendation engine.
6	Ontology Requirements
	a. Non-Functional Requirements
	The system must be scalable to handle large datasets and compatible with OWL standards.
	b. Functional Requirements: Lists or tables of requirements written as Competency Questions and sentences
	List movies by specific directors, find co-starring actors, and filter by genre or IMDB score.
7	Pre-Glossary of Terms (optional)

	a. Terms from Competency Questions
	Movie, Director, Actor, IMDB Score, Release Year, Genre, Duration
	b. Terms from Answers
	Christopher Nolan, Inception, Sci-Fi, 8.8, 2010.
	c. Objects
	directedBy (İlişki), actedIn (İlişki), hasGenre (İlişki), hasTitle (Veri), hasScore (Veri)

- 
- 1) Which movies were directed by [Director Name] and have an IMDB score higher than 8.0?
 - 2) In which movies did [Actor A] and [Actor B] star together?
 - 3) What are the Science Fiction movies released after the year 2015?
 - 4) Who is the director of the movie [Movie Title]?
 - 5) What is the average duration of movies in the "Horror" genre?
